In the last 5 years she has received funding for the development of a research study by the company Thermofisher / Brahms, a company that has never received or analysed the results obtained, nor has she participated in the design of the study, collection, analysis and interpretation of the data, or writing of the published

scientific article. It has not received any funding for conference attendance. She has received sporadic payments as remuneration for different activities, mainly teaching, from the Grupo Madrileño de Cuidados Intensivos, DRK Edition SL, Grupo de RCP de la Zona Sur, Fundación Clínica Universitaria. Scholarship from the "HOPE exchange programme for hospital and healthcare professionals", for a management training stay in Finland in 2019. Funding for research studies by scientific societies (ESPID, SEUP).

Rafael Galera Martínez is a paediatrician, PhD in Medicine and Surgery from the University of Granada and Area Specialist in the Paediatrics Clinical Management Unit of the Torrecárdenas University Hospital in Almería. He is a member of the Nutrition and Breastfeeding Committee of the Spanish Association of Paediatrics. In the last 5 years she declares having received financial remuneration for giving conferences or financial support for travel, accommodation and registration to give and attend courses, conferences and scientific talks related to paediatrics according to the code of good practice of Farmaindustria from the companies Nestlé Health Science, Nutricia, Abbott Laboratories, Fresenius and Mead Johnson Nutrition. He has also received financial support for travel and accommodation or payments for his participation as a lecturer in courses, conferences and master's degrees from the following scientific bodies and societies: Spanish Society of Paediatric Gastroenterology, Hepatology and Nutrition, Spanish Association of Paediatrics-Spanish Paediatrics Foundation, University of Granada, Alfonso X El Sabio University and the Valencian School of Health Studies. He participates as principal investigator at his centre in a multicentre clinical trial promoted by Laboratorios Ordesa SL and in an international multicentre clinical trial promoted by Dairy Goat Cooperative Ltd.

Situations in which editors of *Anales de Pediatría* are to be recused from making decisions:

- He/ She is the author of a manuscript sent to the journal.
- He/ She is collaborator in a research project related to the article.
- The editor exercises his/her professional activity at the same Institution as any of the authors.
- The editor considers that his/her decisions may not be objective for financial, intellectual or personal reasons.
- In doubting situations, or when several editors may have conflicts of interests, the editorial team analyses the manuscript and decides which editor is the most appropriate for the editorial process.
