

SUPPLEMENTARY DATA

Figure 1 of the supplementary data.

Valve-in-valve with Portico FlexNav using the cusp overlap technique. **A:** Cusp overlap view predicted by preprocedural computed tomography on a degenerated Mitroflow surgical valve. **B-C:** Initial positioning of the Portico valve in a RAO/CAU projection with both the FlexNav delivery system and surgical bioprosthesis aligned without parallax. **D:** Final aortogram in a standard left anterior oblique projection.
