

SUPPLEMENTARY DATA

Figure 1 of the supplementary data.

Covariate balance. Balance of the covariables included in the propensity score used in comparisons of echocardiographic measurements between groups before and after weighting.

BMI, body mass index; DBP, diastolic blood pressure; HR, heart rate.

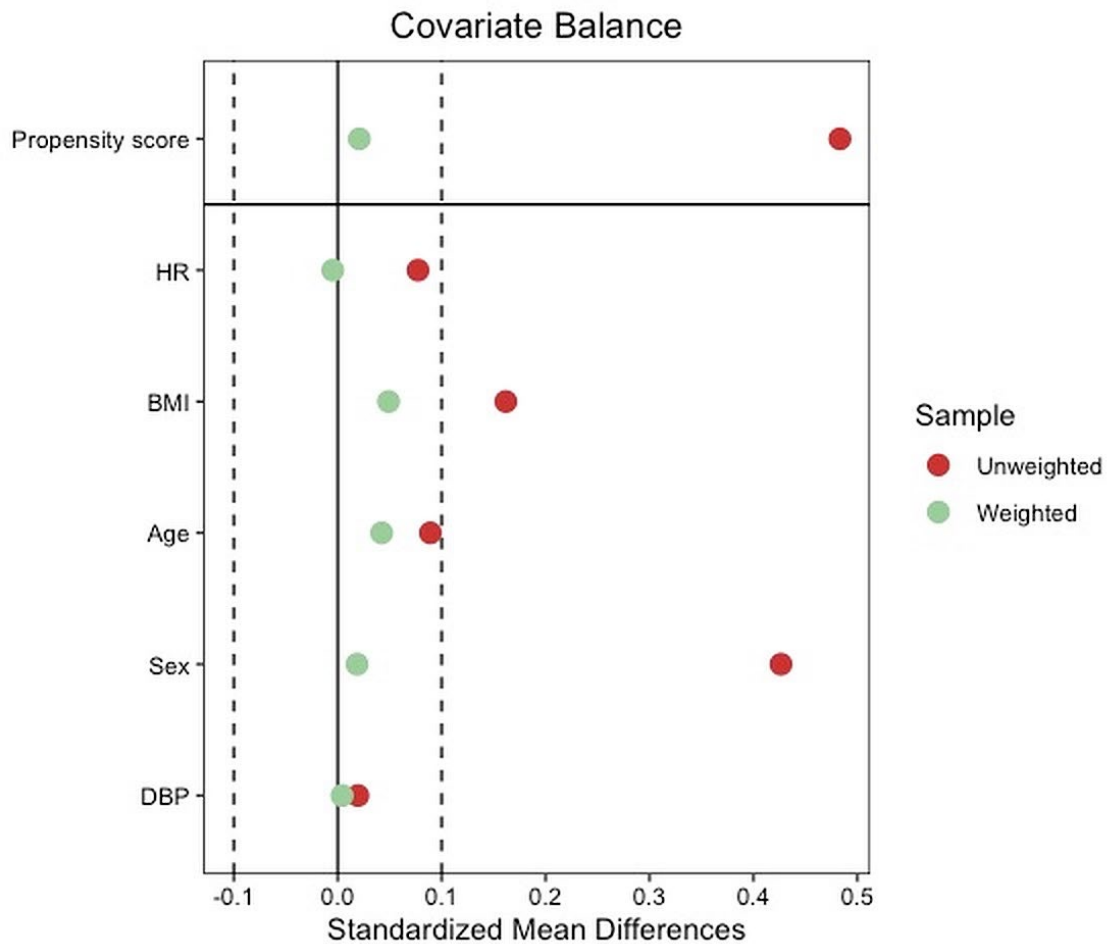

Figure 2 of the supplementary data.

Bland-Altman Plots for left atrial strain measurement. A: PALS intraobserver agreement; B: PALS interobserver agreement; C: LACS intraobserver agreement; D: LACS interobserver agreement; E: PACS Intraobserver agreement; F: PACS interobserver agreement.

LACS, LA strain during the conduit phase; PACS, peak atrial contraction strain; PALS, peak atrial longitudinal strain; SD, standard deviation.
