

GUIDE FOR AUTHORS

Revista de Psicodidáctica publishes works of a scientific nature that are carried out with methodological rigour and make a contribution to the advancement of scientific knowledge in the field between psychology and its teaching. Preference is given the subject of *Psychodidactics*, being understood as a common space of convergence between the psychology of education and the didactics of different academic content. *Psychodidactics*, to say it in another way, is directly associated with the educational and psychoeducational, being understood by this as the variables that intervene (teaching staff, students, contents, procedures, evaluation, etc.) in the teaching / learning processes of different academic contents in the context of formal, non-formal, and informal education. On the other hand, studies centred on subjects common to the basic disciplines (linguistics, sports activities, geography, basic psychology, clinical psychology, etc.) do not belong to the field of psychodidactics.

The articles in Spanish or English will be accepted, and preferably those articles that provide new information and contain the following sections: Introduction, Method (participants, tools, procedures, and statistical analysis), Results, Discussion, and References. The works should be unpublished, and not be in the publication or evaluation process by other Journals.

You should read this Guide for Authors before preparing your manuscript, as well as consulting the example of this article.

Types of articles

The text must be written in an impersonal style and / or present; furthermore, care should be taken to use non-sexist language.

The Journal publishes the following sections or article types:

Originals

Empirical research articles will be published in this section. The maximum length of the article will be 6,500 words, including the structured *Resumen* / Abstract and the 6 *palabras clave* and 6 keywords in Spanish and in English, plus

the body of the article, Figure footnotes, and the Tables. It will include a separate Title or Cover Page in accordance with the instructions include in this Guide.

Information for submission

All manuscripts must be submitted online via the *Revista de Psicodidáctica* Elsevier web page (<https://www.evise.com/evise/jrnl/psicod>) and uploaded to that page.

In this platform, the article structure type must be selected adjusted to the article type / section to which it is wished to be submitted.

Apart from the first page of the article, the rest of the manuscript, and its images, a cover letter must be attached with the following information:

Cover Letter

In which it is indicated:

1. Title of the work.
2. The section of the Journal in which it wished the work will be published.
3. The explanation, in a maximum of one paragraph, of what the original work contributes and the relevance of the work in the field of the Journal.
4. The statement that the work is original and is not in the process of being evaluated by any other scientific journal.
5. In the event that part of the article has been previously published in another Journal (redundant or duplicated publication), the details must be specified here, as well as to declare that they are in possession of the required permissions to publish by the author and the Editor of the Journal from which it was extracted.
6. The statement that the authors have taken into account the "Ethical Responsibilities" included in this Guide.

7. The statement that all the signing authors meet the requirements of authorship as set out in the "Authorship" section of this Guide.
8. The declaration by each one of the authors as regards the existence or not of any conflict of interests and which is stated in the manuscript.
9. That any financial help or acknowledgement is mentioned in the body of the manuscript.

This is a subscription Journal, as such that the authors do not pay for the evaluation or its publication, and in which they transfer their rights of copyright. When the article has been accepted, the author for correspondence will receive a link to sign the transfer of author rights.

Technical support is available by e-mail at the following address: support@elsevier.com. For any request, it is necessary to include the name of the author for correspondence, the title and number of the manuscript (if it has been assigned), and a clear description of the problem.

Ethics in publishing

For information on Ethics in publishing and Ethical guidelines for journal publication see <http://www.elsevier.com/publishingethics> and <http://www.elsevier.com/journal-authors/ethics>.

Human Rights

If the work involves humans, the authors must ensure that the study has been conducted in accordance with International Ethics Code in Humanities and Social Sciences of the Centre for Research Ethics and Bioethics. The authors must include a statement in the manuscript on how the informed consent was obtained on all the subjects studied. The right to privacy should be respected at all times.

Conflicts of interests

All the authors must inform of any financial or personal relationship with other persons or organisations that could have an inappropriate influence (be biased) on their work. Among examples of possible conflicts of interests are: to be employed by the organisation, consultancy services, hold shares, remuneration, remunerated expert testimony, patent requests / registry, and grants or other funding. If there is no conflict of interests, the following must be declared: "Conflict of interests: none".

Further information: http://service.elsevier.com/app/answers/detail/a_id/286/supporthub/publishing.

Submission declaration

Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic

thesis or as an electronic preprint, see <http://www.elsevier.com/sharingpolicy>), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere including electronically in the same form, in English or in any other language, without the written consent of the copyright-holder.

Authorship

All the authors must have made substantial contributions in the whole article.

Changes to authorship

This policy concerns the addition, deletion, or rearrangement of author names in the authorship of accepted manuscripts:

Before the accepted manuscript is published in an online issue: Requests to add or remove an author, or to rearrange the author names, must be sent to the Journal Manager from the corresponding author of the accepted manuscript and must include: (a) the reason the name should be added or removed, or the author names rearranged and (b) written confirmation (e-mail, fax, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed. Requests that are not sent by the corresponding author will be forwarded by the Journal Manager to the corresponding author, who must follow the procedure as described above. Note that: (1) Journal Managers will inform the Journal Editor-in-chief of any such requests and (2) publication of the accepted manuscript in an online issue is suspended until authorship has been agreed.

After the accepted manuscript is published in an online issue: Any requests to add, delete, or rearrange author names in an article published in an online issue will not be possible.

Copyright

Upon acceptance of an article, authors will be asked to complete a 'Journal Publishing Agreement' (for more information on this and copyright, see <http://www.elsevier.com/copyright>). An e-mail will be sent to the corresponding author confirming receipt of the manuscript together with a 'Journal Publishing Agreement' form or a link to the online version of this agreement.

Author rights

As an author you (or your employer or institution) have certain rights to re-use your work. For more information on author rights please see <http://www.elsevier.com/copyright>.

Role of the funding source

You are requested to identify who provided financial support for the conducting of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in the study design; in the collection, analysis, and interpretation of data; in the writing of the article; and in the decision to submit the article for publication. If the funding source(s) had no such involvement then this should be stated.

Funding body agreements and policies

Elsevier has established a number of agreements with funding bodies which allow authors to comply with the open access policies of their funding source. Some authors may also be reimbursed for associated publication fees. To learn more about existing agreements please visit <http://www.elsevier.com/fundingbodies>.

The Publishing Campus

The Elsevier Publishing Campus (<http://www.publishingcampus.com>) is an online platform that offers free classes, interactive training, and professional advice in order to provide support for the publishing of research articles. The Skills School training offers modules on how to prepare, write, and structure articles, as well as to explain how the Editors evaluate them when they are submitted for publishing. The authors should take advantage of these and other resources in order to ensure that their manuscript is of the highest quality possible.

Language (usage and editing services)

Please write your text in good English (American or British usage is accepted, but not a mixture of these) and Spanish. Authors who feel their English or Spanish language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's WebShop (<http://webshop.elsevier.com/languageediting/>) or visit our customer support site (<http://support.elsevier.com>) for more information.

Submission

Our online submission system guides you stepwise through the process of entering your article details and uploading your files. The system converts your article files to a single PDF file used in the peer-review process. All correspondence, including notification of the Editor's decision and requests for revision, is sent by e-mail.

Submit your article

Please submit your article via <http://ees.elsevier.com/repod>.

Referees

Please submit the names and institutional e-mail addresses of three potential referees. For more details, visit our support site: http://service.com/app/answer/detail/a_id/8238/p/10523/supporthub/publishing. Note that the editor retains the sole right to decide whether or not the suggested reviewers are used.

Preparation

Double-blind review

This journal uses double-blind review, which means that both the reviewer and author name(s) are not allowed to be revealed to one another for a manuscript under review. The identities of the authors are concealed from the reviewers, and vice versa. For more information please refer to <http://www.elsevier.com/reviewers/peer-review>.

Use of word processing software

It is important that the file be saved in the native format of the word processor used. The text should be in single-column format. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. In particular, do not use the word processor's options to justify text or to hyphenate words. However, do use bold face, italics, subscripts, superscripts etc. When preparing tables, if you are using a table grid, use only one grid for each individual table and not a grid for each row. If no grid is used, use tabs, not spaces, to align columns. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the Guide to Publishing with Elsevier: <http://www.elsevier.com/guidepublication>). Note that source files of figures, tables and text graphics will be required whether or not you embed your figures in the text. See also the section on Electronic artwork.

To avoid unnecessary errors you are strongly advised to use the 'spell-check' and 'grammar-check' functions of your word processor.

Article structure

Main page

Title. Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.

Author names and affiliations. Please clearly indicate the given name(s) and family name(s) of each author and check that all names are accurately spelled. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lower-case superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author.

Corresponding author. Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. Ensure that the e-mail address is given and that contact details are kept up to date by the corresponding author.

Present/permanent address. If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent ad-

dress') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.

Abstract

A concise abstract must be included (maximum 250 words) that should briefly describe the aim of the work, the principal results, and the most important conclusions. The Abstract is often read separately from the article, therefore, its content should be structured, independent and complete. For this reason, it may not contain references and, if they are really essential, their author and the year of their publication will be included. They should not include uncommon abbreviations either and, if they are really essential, they will be defined in the Abstract the first time that they are used.

Highlights

The Highlights are a brief collection of vignettes (short sentences) that transmit the main conclusions of the article. The Highlights are obligatory and must be presented in a separate editable file using the online submission address. Please use "Highlights" in the name of the file that consists of 3 to 5 key points (a maximum of 80 characters, including spaces). An example can be seen on our page: <https://www.elsevier.com/highlights>.

Keywords

Immediately after the abstract, provide a maximum of 6 keywords, using American or British spelling and avoiding general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Be sparing with abbreviations: only abbreviations firmly established in the field may be eligible. These keywords will be used for indexing purposes.

Acknowledgements

Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. Acknowledgments should appear (if case) as the first endnote. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).

Math formulae

Please submit math equations as editable text and not as images. Present simple formulae in line with normal text where possible and use the solidus (/) instead of a horizontal line for small fractional terms, e.g., X/Y. In principle, variables are to be presented in italics. Powers of e are often more conveniently denoted by exp. Number consecutively any equations that have to be displayed separately from the text (if referred to explicitly in the text).

Artwork

Electronic artwork

General points

- Make sure you use uniform lettering and sizing of your original artwork.
- Embed the used fonts if the application provides that option.
- Aim to use the following fonts in your illustrations: Arial, Courier, Times New Roman, Symbol, or use fonts that look similar.
- Number the illustrations according to their sequence in the text.
- Use a logical naming convention for your artwork files.
- Provide captions to illustrations separately.
- Size the illustrations close to the desired dimensions of the published version.
- Submit each illustration as a separate file.

A detailed guide on electronic artwork is available on our website: <http://www.elsevier.com/artworkinstructions>.

You are urged to visit this site; some excerpts from the detailed information are given here.

Formats

If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply 'as is' in the native document format.

Regardless of the application used other than Microsoft Office, when your electronic artwork is finalized, please 'Save as' or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):

EPS (or PDF): Vector drawings, embed all used fonts.

TIFF (or JPEG): Colour or grayscale photographs (halftones); keep to a minimum of 300 dpi.

TIFF (or JPEG): Bitmapped (pure black & white pixels) line drawings, keep to a minimum of 1000 dpi. TIFF (or JPEG): Combinations bitmapped line/half-tone (colour or grayscale), keep to a minimum of 500 dpi.

Please do not:

- Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); these typically have a low number of pixels and limited set of colours;
- Supply files that are too low in resolution;
- Submit graphics that are disproportionately large for the content.

Colour artwork

Please make sure that artwork files are in an acceptable format (TIFF (or JPEG), EPS (or PDF), or MS Office files) and with the correct resolution. If, together with your accepted article, you submit usable colour figures then Elsevier will ensure, at no additional charge, that these figures will appear in colour online (e.g., ScienceDirect and other sites) regardless of whether or not these illustrations are reproduced in colour in the printed version. **For colour reproduction in print, you will receive information regarding the costs from Elsevier after receipt of your accepted article.** Please indicate your preference for colour: in print or online only. For further information on the preparation of electronic artwork, please see <http://www.elsevier.com/artworkinstructions>.

Please note: Because of technical complications that can arise by converting colour figures to 'grey scale' (for the printed version should you not opt for colour in print) please submit in addition usable black and white versions of all the colour illustrations.

Illustration services

Elsevier's WebShop (<http://webshop.elsevier.com/illustrationservices>) offers Illustration Services to authors preparing to submit a manuscript but concerned about the quality of the images accompanying their article. Elsevier's expert illustrators can produce scientific, technical and medical-style images, as well as a full range of charts, tables and graphs. Image 'polishing' is also available, where our illustrators take your image(s) and improve them to a professional standard. Please visit the website to find out more.

Figure captions

Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title (**not** on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

Tables

Please submit tables as editable text and not as images. Tables can be placed either next to the relevant text in the article, or on separate page(s) at the end. Number tables consecutively in accordance with their appearance in the text and place any table notes below the table body. Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article. Please avoid using vertical rules.

References

Citation in text

The high visibility of research works among experts and professionals is guaranteed due to the online links of the literature references cited. In order to create links in the Index services (e.g., Scopus, CrossRef and PubMed), the information provided in the bibliography needs to be correct. Remember that incorrect data (surname, title, year of publication, page, etc.) could make it difficult to create links. If the References have been copied, they could contain inadvertent errors. It is recommended to use the

DOI (Digital Object Identifier). The DOI can be used to cite and create links to online articles when an article is *in print* and the full details of the reference are not yet known, although the article is available in its online version. A DOI does not change anything and can be used as a link to any online article. An example of a Reference using the DOI of an article that has not yet been published would be: "Van-De-car J.C., Russo R.M., James D.E., Ambeh W.B., Franke M. (2003). Aseismic continuation of the Lesser Antilles slab beneath northeastern Venezuela. *Journal of Geophysical Research*, doi.org/10.1029/2001JB000884i." The format of these bibliographic references must be the same as the rest of the references.

Web references

As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

References in a special issue

Please ensure that the words 'this issue' are added to any references in the list (and any citations in the text) to other articles in the same Special Issue.

Reference Style

Text: References in the text must follow the style of references used by the American Psychological Association. Consult the Publication Manual of the American Psychological Association, Sixth Edition, ISBN 978-1-4338-0561-5; copies of the Manual may be requested online or from APA Order Dept., P.O.B. 2710, Hyattsville, MD 20784, USA, and also from APA, 3 Henrietta Street, London, WC3E 8LU, UK.

List: The references must first be presented in alphabetic order and then chronologically, if necessary. If there is more than one reference from the same author in the same year, these must be identified by the letter "a", "b", "c", etc., after the year of publication.

Examples:

Journal References:

Van der Geer, J., Hanraads, J. A. J., & Lupton, R. A. (2010). The art of writing a scientific article. *Journal of Scientific Communications*, 163, 51–59.

Book References:

Strunk, W., Jr., & White, E. B. (2000). *The elements of style*. (4th ed.). New York: Longman.

References to a chapter in a published book:

Mettam, G. R., & Adams, L. B. (2009). How to prepare an electronic version of your article. In B. S. Jones, & R. Z. Smith (Eds.), *Introduction to the electronic age* (pp. 281–304). New York: E-Publishing Inc.

Web page references:

Cancer Research UK. *Cancer statistics reports for the UK*. (2003). <http://www.cancerresearchuk.org/aboutcancer/statistics/cancerstatsreport/> Accessed 13.03.03.

Supplementary material

Elsevier accepts electronic supplementary material to support and enhance your scientific research. Supplementary files offer the author additional possibilities to publish supporting applications, high-resolution images, background datasets, sound clips and more. Supplementary files supplied will be published online alongside the electronic version of your article in Elsevier Web products, including ScienceDirect: <http://www.sciencedirect.com>.

In order to ensure that your submitted material is directly usable, please provide the data in one of our recommended file formats. Authors should submit the material in electronic format together with the article and supply a concise and descriptive caption for each file.

For more detailed instructions please visit our artwork instruction pages at <http://www.elsevier.com/artworkinstructions>.

Submission checklist

The following list will be useful during the final checking of an article prior to sending it to the journal for review. Please consult this Guide for Authors for further details of any item.

Ensure that the following items are present:

- One author has been designated as the corresponding author with contact details: E-mail address, Full postal address.
- All necessary files have been uploaded, and contain: Keywords, all figure captions, all tables (including title, description, footnotes).
- Manuscript has been 'spell-checked' and 'grammar-checked'.
- References are in the correct format for this journal.
- All references mentioned in the Reference list are cited in the text, and vice versa.
- Permission has been obtained for use of copyrighted material from other sources (including the Internet).
- Printed version of figures (if applicable) in colour or black-and-white.
- Indicate clearly whether or not colour or black-and-white in print is required.

For any further information please visit our customer support site at <http://support.elsevier.com>.

After acceptance

Availability of the published article

This Journal publishes accepted articles online in their final *in print* version, in HTML and PDF format, and with an assigned DOI, which means that the article may be cited and appear in results searched by title, name of author and text of the article. When an article is published in an issue, the *in print* version disappears.

After the final acceptance of the article, the authors may send, within a period of one month, a version of the article in Castilian if it has initially been submitted in English. And if the article was submitted in Castilian, the second version should be in English.

Proofs

One set of page proofs (as PDF files) will be sent by e-mail to the corresponding author (if we do not have an e-mail address then paper proofs will be sent by post) or, a link will be provided in the e-mail so that authors can download the files themselves. Elsevier now provides authors with PDF proofs which can be annotated; for this you will need to download Adobe Reader version 9 (or higher) available free from <http://get.adobe.com/reader>. Instructions on how to annotate PDF files will accompany the proofs (also given online). The exact system requirements are given at the Adobe site: <http://www.adobe.com/products/reader/tech-specs.html>.

If you do not wish to use the PDF annotations function, you may list the corrections (including replies to the Query Form) and return them to Elsevier in an e-mail. Please list your corrections quoting line number. If, for any reason, this is not possible, then mark the corrections and any other comments (including replies to the Query Form) on a printout of your proof and return by fax, or scan the pages and e-mail, or by post. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. We will do everything possible to get your article published quickly and accurately. It is important to ensure that all corrections are sent back to us in one communication: please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility.

Additional prints

At no cost, the author for correspondence will be sent a PDF file of the article by e-mail (the PDF is a version of the published article with a watermark; it includes a first page

with the cover of the Journal and a statement on the terms of its use). For an additional cost, additional prints may be requested using the form that is sent when the article is accepted for publishing. The authors for correspondence, as well as the co-authors, can request additional copies at any time through the Elsevier Online Shop (<http://webshop.elsevier.com/myarticleservices/offprints>). Authors who wish printed copies of multiple articles can use the Elsevier service "Create Your Own Book" (<http://webshop.elsevier.com/myarticleservices/booklets>).

Author inquiries

You can track your submitted article at <http://www.elsevier.com/track-submission>. You can track your accepted article at <http://www.elsevier.com/trackarticle>. You are also welcome to contact Customer Support via <http://support.elsevier.com>.
