

# Journal of & Innovation & Knowledge

## GUIDE FOR AUTHORS

The Journal of Innovation and Knowledge (JIK) focuses on how we gain knowledge through innovation and how knowledge encourages new forms of innovation. Not all innovation leads to knowledge. Only enduring innovation that can be generalized across multiple fields creates theory and knowledge. JIK welcomes papers on innovations that improve the quality of knowledge or that can be used to develop knowledge. Innovation is a broad concept, covering innovation processes, structures, outcomes, antecedents, and behaviors at the organizational level in the private and public sectors as well as at the individual, national, and professional levels. JIK articles explore knowledge-related changes that introduce or encourage innovation to promote best practices within society.

JIK provides an outlet for high-quality studies that have undergone double-blind peer review. In doing so, JIK ensures that such studies reach a global readership of scholars, consultants, practitioners, international leaders, and policymakers who recognize the importance of innovation and knowledge as economic drivers and who base their decisions on new ideas and findings in innovation and knowledge. JIK was created under the auspices of the Global Innovation and Knowledge Academy (GIKA).

JIK publishes content in the form of theoretical articles, empirical studies employing quantitative or qualitative methods, practice-oriented papers, teaching-oriented papers, case studies, book reviews, conference reports, short articles on current trends in science and society, abstracts of recent innovation and knowledge PhDs, and shorter opinion-based and review articles, commentaries, and debates. JIK publishes state-of-the-art research on emerging topics in the world of innovation and knowledge and appeals to a broad readership. The editors welcome suggestions for special issue topics. JIK articles should demonstrate contextual differences, while highlighting lessons for the wider audience.

In sum, JIK is an interdisciplinary journal devoted to advancing theoretical and practical innovations and knowledge in a range of fields, including Economics, Business and Management, Engineering, Science, and Education.

**The editorial process.** The Editorial board is composed of senior scientists with local roots to facilitate in-person meetings and follow revision processes closely. Editors assess in first place the potential value added of the paper as a function of the problem statement, proper methodology and relevant implications. Papers that do not fall within the scope of the Journal or that do not reach a minimum threshold are returned to the authors (desk-rejected), usually within up to five days. Papers that are considered suitable for revision are reviewed using a 'double blind' process. Referees are asked to read the article and try to figure out if anybody else would. If the answer is yes, we ask them to tell us who will be interested in the results and why, highlight any technical flaws that could compromise the authors' contribution, and make suggestions that should be basically editorial in nature. This feedback will be thoughtfully considered by the Editors before sending their decision to the corresponding author. The judgment about which changes are needed and which papers will interest JIK's broad readership is made by our editors and referees. The Editors' goal is to minimize rounds and increase speed while guaranteeing a rigorous contribution. Papers accepted by JIK will provide immediate access and doi citation to finalized manuscripts prior to its assignment to an issue.

## **BEFORE YOU BEGIN**

### ***Ethics in publishing***

For information on Ethics in publishing and Ethical guidelines for journal publication see <http://www.elsevier.com/publishingethics> and <http://www.elsevier.com/journal-authors/ethics>.

The Editorial Board of JIK encourages authors and demands of our selves the highest ethical standards in academic publishing. This is important to preserve the reputation of JIK and GIKA, research institutions, funding bodies and authors, but at the same time it is the only way to ensure scientific progress

There are several cornerstones in the pursuit of ethical excellence. The publisher of JIK, for instance, offers a website with tools and resources that allow authors to proceed confidently: <http://www.elsevier.com/ethics/home>. This website helps authors and editors to avoid misconduct in several important issues:

1. Duplicate submissions: Authors have an obligation to make sure their paper is based on original—never before published—research. Intentionally submitting or re-submitting work for duplicate publication is considered a breach of publishing ethics.
2. Research fraud: Both fabrication (making up research data and results) and falsification of data (changing or omitting data or results in such a way that the research is not accurately represented) are serious forms of misconduct because they result in a scientific record that does not accurately reflect observed truth.
3. Authorship: Naming authors on a scientific paper ensures that the appropriate individuals get credit, and are accountable, for the research. Deliberately misrepresenting a scientist's relationship to their work is considered to be a form of misconduct that undermines confidence in the reporting of the work itself.
4. Conflict of interest: When an investigator, author, editor, or reviewer has a financial/personal interest or belief that could affect his/her objectivity, or inappropriately influence his/her actions, a potential conflict of interest exists. Such relationships are also known as dual commitments, competing interests, or competing loyalties.
5. Plagiarism: Using deliberately another's work without permission, credit, or acknowledgment, is one of the most common types of publication misconduct. JIK compares submitted documents to extensive data repositories to detect any significant text matches.

Infractions may result in the application of sanctions by the Editorial Board, including the suspension or revocation of publishing privileges not only in JIK but also in other journals printed by the most popular publishers

### ***Conflict of interest***

All authors are requested to disclose any actual or potential conflict of interest including any financial, personal or other relationships with other people or organizations within three years of beginning the submitted work that could inappropriately influence, or be perceived to influence, their work. See also <http://www.elsevier.com/conflictsofinterest>. Further information and an example of a Conflict of Interest form can be found at: [http://help.elsevier.com/app/answers/detail/a\\_id/286/p/7923](http://help.elsevier.com/app/answers/detail/a_id/286/p/7923).

### ***Submission declaration***

Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis or as an electronic preprint, see <http://www.elsevier.com/sharingpolicy>), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere including electronically in the same form, in English or in any other language, without the written consent of the copyright-holder.

### **Changes to authorship**

This policy concerns the addition, deletion, or rearrangement of author names in the authorship of accepted manuscripts:

*Before the accepted manuscript is published in an online issue:* Requests to add or remove an author, or to rearrange the author names, must be sent to the Journal Manager from the corresponding author of the accepted manuscript and must include: (a) the reason the name should be added or removed, or the author names rearranged and (b) written confirmation (e-mail, fax, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed. Requests that are not sent by the corresponding author will be forwarded by the Journal Manager to the corresponding author, who must follow the procedure as described above. Note that: (1) Journal Managers will inform the Journal Editor-in-chief of any such requests and (2) publication of the accepted manuscript in an online issue is suspended until authorship has been agreed.

*After the accepted manuscript is published in an online issue:* Any requests to add, delete, or rearrange author names in an article published in an online issue will not be possible.

### **Copyright**

Upon acceptance of an article, authors will be asked to complete a 'Journal Publishing Agreement' (for more information on this and copyright, see <http://www.elsevier.com/copyright>). An e-mail will be sent to the corresponding author confirming receipt of the manuscript together with a 'Journal Publishing Agreement' form or a link to the online version of this agreement.

### **Author rights**

As an author you (or your employer or institution) have certain rights to reuse your work. For more information on author rights please see <http://www.elsevier.com/copyright>.

### **Role of the funding source**

You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement then this should be stated.

### **Funding body agreements and policies**

Elsevier has established a number of agreements with funding bodies which allow authors to comply with their funder's open access policies. Some authors may also be reimbursed for associated publication fees. To learn more about existing agreements please visit <http://www.elsevier.com/fundingbodies>.

### **Open Access**

This is an open access journal with not publication charges, costs or fees for publication. All articles will be immediately and permanently free for everyone to read and download.

### **Language (usage and editing services)**

Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's WebShop (<http://webshop.elsevier.com/languageediting/>) or visit our customer support site (<http://support.elsevier.com>) for more information.

## **Submission**

Our online submission system guides you stepwise through the process of entering your article details and uploading your files. The system converts your article files to a single PDF file used in the peer-review process. Editable files (e.g., Word, LaTeX) are required to typeset your article for final publication. All correspondence, including notification of the Editor's decision and requests for revision, is sent by e-mail.

### *Submit your article*

Please submit your article via <http://ees.elsevier.com/jik>.

## **Referees**

Please submit the names and institutional e-mail addresses of three potential referees. For more details, visit our [Support site](#). Note that the editor retains the sole right to decide whether or not the suggested reviewers are used.

## **PREPARATION**

Do tell in your cover letter what is unique and valuable about the paper when you submit the paper.

### **Double-blind review**

This journal uses double-blind review, which means that both the reviewer and author name(s) are not allowed to be revealed to one another for a manuscript under review. The identities of the authors are concealed from the reviewers, and vice versa. For more information please refer to <http://www.elsevier.com/reviewers/peer-review>. To facilitate this, please include the following separately:

*Title page (with author details):* This should include the title, authors' names and affiliations, and a complete address for the corresponding author including an e-mail address.

*Blinded manuscript (no author details):* The main body of the paper (including the references, figures, tables and any Acknowledgements) should not include any identifying information, such as the authors' names or affiliations.

### **Use of word processing software**

It is important that the file be saved in the native format of the word processor used. The text should be in single-column format. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. In particular, do not use the word processor's options to justify text or to hyphenate words. However, do use bold face, italics, subscripts, superscripts etc. When preparing tables, if you are using a table grid, use only one grid for each individual table and not a grid for each row. If no grid is used, use tabs, not spaces, to align columns. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the Guide to Publishing with Elsevier: <http://www.elsevier.com/guidepublication>). Note that source files of figures, tables and text graphics will be required whether or not you embed your figures in the text. See also the section on Electronic artwork.

To avoid unnecessary errors you are strongly advised to use the 'spell-check' and 'grammar-check' functions of your word processor.

### *Embedded math equations*

If you are submitting an article prepared with Microsoft Word containing embedded math equations then please read this related support information ([http://support.elsevier.com/app/answers/detail/a\\_id/302/](http://support.elsevier.com/app/answers/detail/a_id/302/)).

### Article structure *Submission guidelines*

1. Papers are expected to be submitted in English. All manuscript considered for submission must be sent online by accessing the Elsevier Editorial System at <http://ees.elsevier.com/jik>.
2. Authors must send, at least, two documents. Title page with full names, titles and affiliations of authors and the Main document, without providing any authors' information. Authors should also provide an abstract of up to 250 words, at least a JEL code and a maximum of six keywords.
3. Submissions will be acknowledged by email.
4. Papers submitted should be original and not under consideration by another journal.
5. The suggested limit for papers is 25-35 pages (word formatting) including figures, tables, footnotes and references. Manuscripts should be double-spaced and use a 12-point readable font.
6. Footnotes are incorporated into the text and numbered consecutively throughout the article.
7. Tables and figures should be included separately at the end of the document. They should be consecutively numbered indicating their title and source, as well as their approximate position in the main text. Round correlations to two decimal places in text and tables. Usually round means to whole numbers or to one or two decimal places.
8. References will be cited in text with an author-date system. Citations will be listed alphabetically at the end of the paper. Please ensure that every reference cited has a corresponding citation in the text and vice versa.

### *Subdivision - sections*

Divide your article into clearly defined sections. Main headings should be used to designate the major sections of an article. Any subsection may be given a brief heading. Each heading should appear on its own separate line. Do not number them. Left margin main headings, type them using bold font for headings and italic font for sub-headings.

### *Essential title page information*

- **Title.** Concise and informative. Titles are often used in information retrieval systems. Avoid abbreviations and formulae where possible.
- **Author names and affiliations.** Please clearly indicate the given name(s) and family name(s) of each author and check that all names are accurately spelled. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lower-case superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author.
- **Corresponding author.** Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. **Ensure that the e-mail address is given and that contact details are kept up to date by the corresponding author.**
- **Present/permanent address.** If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.

### *Keywords*

Immediately after the abstract, provide a maximum of 6 keywords, using American or British spelling and avoiding general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Be sparing with abbreviations: only abbreviations

firmly established in the field may be eligible. These keywords will be used for indexing purposes.

### **Classification codes**

Immediately after the keywords, provide up to 6 standard JEL codes. The available codes may be accessed at JEL: <http://www.aeaweb.org/jel/guide/jel.php>.

### **Abbreviations**

Define abbreviations that are not standard in this field in a footnote to be placed on the first page of the article. Such abbreviations that are unavoidable in the abstract must be defined at their first mention there, as well as in the footnote. Ensure consistency of abbreviations throughout the article.

### **Acknowledgements**

Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. Acknowledgments should appear (if case) as the first endnote. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).

### **Math formulae**

Please submit math equations as editable text and not as images. Present simple formulae in line with normal text where possible and use the solidus (/) instead of a horizontal line for small fractional terms, e.g., X/Y. In principle, variables are to be presented in italics. Powers of e are often more conveniently denoted by exp. Number consecutively any equations that have to be displayed separately from the text (if referred to explicitly in the text).

### **Footnotes**

Footnotes should be used sparingly. Number them consecutively throughout the article. Many word processors can build footnotes into the text, and this feature may be used. Otherwise, please indicate the position of footnotes in the text and list the footnotes themselves separately at the end of the article. Do not include footnotes in the Reference list. Footnotes should be avoided unless absolutely necessary. They should appear at the end of an article in a separate page, just after conclusions and just before the references.

### **Appendix**

Present lengthy but essential methodological details, such as explanations of the calculation of measures, in an appendix or appendixes. Presentation should be concise but not abbreviated. Entitle a single appendix Appendix, typed in upper and lower case bold; multiple appendixes are Appendix A, Appendix B...

### **Artwork**

#### *Electronic artwork General points*

- Make sure you use uniform lettering and sizing of your original artwork.
- Embed the used fonts if the application provides that option.
- Aim to use the following fonts in your illustrations: Arial, Courier, Times New Roman, Symbol, or use fonts that look similar.
- Number the illustrations according to their sequence in the text.
- Use a logical naming convention for your artwork files.
- Provide captions to illustrations separately.
- Size the illustrations close to the desired dimensions of the published version.
- Submit each illustration as a separate file.

A detailed guide on electronic artwork is available on our website:  
<http://www.elsevier.com/artworkinstructions>.

**You are urged to visit this site; some excerpts from the detailed information are given here.**

### *Formats*

If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply 'as is' in the native document format.

Regardless of the application used other than Microsoft Office, when your electronic artwork is finalized, please 'Save as' or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):

- EPS (or PDF): Vector drawings, embed all used fonts.
- TIFF (or JPEG): Color or grayscale photographs (halftones), keep to a minimum of 300 dpi.
- TIFF (or JPEG): Bitmapped (pure black & white pixels) line drawings, keep to a minimum of 1000 dpi. TIFF (or JPEG): Combinations bitmapped line/half-tone (color or grayscale), keep to a minimum of 500 dpi.

### **Please do not:**

- Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); these typically have a low number of pixels and limited set of colors;
- Supply files that are too low in resolution;
- Submit graphics that are disproportionately large for the content.

### *Color artwork*

Please make sure that artwork files are in an acceptable format (TIFF (or JPEG), EPS (or PDF), or MS Office files) and with the correct resolution. If, together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color online (e.g., ScienceDirect and other sites) regardless of whether or not these illustrations are reproduced in color in the printed version. **For color reproduction in print, you will receive information regarding the costs from Elsevier after receipt of your accepted article.** Please indicate your preference for color: in print or online only. For further information on the preparation of electronic artwork, please see <http://www.elsevier.com/artworkinstructions>.

Please note: Because of technical complications that can arise by converting color figures to 'gray scale' (for the printed version should you not opt for color in print) please submit in addition usable black and white versions of all the color illustrations.

### **Illustration services**

Elsevier's WebShop (<http://webshop.elsevier.com/illustrationservices>) offers Illustration Services to authors preparing to submit a manuscript but concerned about the quality of the images accompanying their article. Elsevier's expert illustrators can produce scientific, technical and medical-style images, as well as a full range of charts, tables and graphs. Image 'polishing' is also available, where our illustrators take your image(s) and improve them to a professional standard. Please visit the website to find out more.

### *Figure captions*

Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title (**not** on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

### **Tables**

Please submit tables as editable text and not as images. Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article. Please avoid using vertical rules.

### **References**

#### *Citation in text*

The APA citation format should be followed. For more information see <http://www.apastyle.org>. Citations should be made in the text by enclosing the cited authors' names and the year of the work cited in parentheses. If a work has between two and six authors, list all authors the first time it is cited, then use "et al.". For more than six authors, use the "et al." form even for the first citation. But the matching reference should give all the authors.

When citing studies carried out by more than one person in the main body of the text, the name of the last author should be preceded by the symbol '&' (e.g. Zahra & Covin, 1995). But they should appear using the word "and"... "In this chapter, Berry and Smith (1983, p. 25) defined it as "attracting, maintaining, and enhancing customer relationships".

Please list in the order of year of publication for several studies (e.g., Friezt, 1998; Collins, 2002).

Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Any references cited in the abstract must be given in full. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the journal and should include a substitution of the publication date with either 'Unpublished results' or 'Personal communication'. Citation of a reference as 'in press' implies that the item has been accepted for publication.

#### *Reference links*

Increased discoverability of research and high quality peer review are ensured by online links to the sources cited. In order to allow us to create links to abstracting and indexing services, such as Scopus, CrossRef and PubMed, please ensure that data provided in the references are correct. Please note that incorrect surnames, journal/book titles, publication year and pagination may prevent link creation. When copying references, please be careful as they may already contain errors. Use of the DOI is encouraged.

#### *Web references*

As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

#### *References in a special issue*

Please ensure that the words 'this issue' are added to any references in the list (and any citations in the text) to other articles in the same Special Issue.

#### *Reference management software*

Most Elsevier journals have a standard template available in key reference management packages. This covers packages using the Citation Style Language, such as Mendeley (<http://www.mendeley.com/features/reference-manager>) and also others like EndNote (<http://www.endnote.com/support/enstyles.asp>) and Reference Manager (<http://refman.com/downloads/styles>). Using plugins to word processing packages which are available from the above sites, authors only need to select the appropriate journal tem-

plate when preparing their article and the list of references and citations to these will be formatted according to the journal style as described in this Guide. The process of including templates in these packages is constantly ongoing. If the journal you are looking for does not have a template available yet, please see the list of sample references and citations provided in this Guide to help you format these according to the journal style.

If you manage your research with Mendeley Desktop, you can easily install the reference style for this journal by clicking the link below:

<http://open.mendeley.com/use-citation-style/jik-journal-innovation-knowledge>.

When preparing your manuscript, you will then be able to select this style using the Mendeley plugins for Microsoft Word or LibreOffice. For more information about the Citation Style Language, visit <http://citationstyles.org>.

### Reference Style

References will be cited in text with an author-date system. Citations will be listed alphabetically at the end of the paper. Please ensure that every reference cited has a corresponding citation in the text and vice versa.

### Examples of referencing style

#### Books:

Hunter, J. E., & Schmidt, F. L. (2004). *Meta-analysis: correcting error and bias in research findings* (2nd ed.). Sage, Thousand Oaks, CA.

#### Book chapters:

Galaskiewicz, J., & Colman, M. S. (2006). Collaboration between corporations and non-profit organizations. In W. W. Powell, & R. Steinburg (Eds.), *The non-profit sector: a research handbook* (pp. 180-204). New Haven/London: Yale University Press.

#### Journals:

David, R.J., & Han, S.K. (2004). A systematic assessment of the empirical support for transaction cost economics. *Strategic Management Journal*, 25(1), 39-58.

#### In press:

Murphy, M., Arenas, D., & Batista, J.M. (2014). Value creation in crosssector collaborations: the roles of experience and alignment. *Journal of Business Ethics*. Retrieved from <http://dx.doi.org/10.1007/s10551-014-2204-x>.

#### Papers presented at a Conference:

Gutiérrez, R., Schmutzler, J., Márquez, P., & Reficco, C. (2012, May). Survival and demise of alliances within a portfolio to develop an inclusive business. In *3rd International Symposium on Cross Sector Social Interactions, Making a difference: enhancing the impact of partnerships for the social good*, Rotterdam, Holland.

#### References taken from a website:

US Department of State. *Philippine country commercial guide FY 2001*. Retrieved 09/08/2004 from [http://www.state.gov/www/about\\_state/business/com\\_guides/2001/eap/philippines\\_ccg2001.pdf](http://www.state.gov/www/about_state/business/com_guides/2001/eap/philippines_ccg2001.pdf)

#### Data references:

This journal encourages you to cite underlying or relevant datasets in your manuscript by citing them in your text and including a data reference in your Reference List. Data references should include the following elements: author name(s), dataset title, data repository, version (where available), year, and global persistent identifier. Add [dataset] immediately before the reference so we can properly identify it as a data reference. This identifier will not appear in your published article.

[dataset] Oguro, M., Imahiro, S., Saito, S., Nakashizuka, T. (2015). *Mortality data for Japanese oak wilt disease and surrounding forest compositions*. Mendeley Data, v1. <http://dx.doi.org/10.17632/xwj98nb39r.1>.

### **Video data**

Elsevier accepts video material and animation sequences to support and enhance your scientific research. Authors who have video or animation files that they wish to submit with their article are strongly encouraged to include links to these within the body of the article. This can be done in the same way as a figure or table by referring to the video or animation content and noting in the body text where it should be placed. All submitted files should be properly labeled so that they directly relate to the video file's content. In order to ensure that your video or animation material is directly usable, please provide the files in one of our recommended file formats with a preferred maximum size of 150 MB. Video and animation files supplied will be published online in the electronic version of your article in Elsevier Web products, including ScienceDirect: <http://www.sciencedirect.com>. Please supply 'stills' with your files: you can choose any frame from the video or animation or make a separate image. These will be used instead of standard icons and will personalize the link to your video data. For more detailed instructions please visit our video instruction pages at <http://www.elsevier.com/artworkinstructions>. Note: since video and animation cannot be embedded in the print version of the journal, please provide text for both the electronic and the print version for the portions of the article that refer to this content.

### **Supplementary material**

Elsevier accepts electronic supplementary material to support and enhance your scientific research. Supplementary files offer the author additional possibilities to publish supporting applications, high-resolution images, background datasets, sound clips and more. Supplementary files supplied will be published online alongside the electronic version of your article in Elsevier Web products, including ScienceDirect: <http://www.sciencedirect.com>. In order to ensure that your submitted material is directly usable, please provide the data in one of our recommended file formats. Authors should submit the material in electronic format together with the article and supply a concise and descriptive caption for each file. For more detailed instructions please visit our artwork instruction pages at <http://www.elsevier.com/artworkinstructions>.

### **Submission checklist**

The following list will be useful during the final checking of an article prior to sending it to the journal for review. Please consult this Guide for Authors for further details of any item.

#### **Ensure that the following items are present:**

One author has been designated as the corresponding author with contact details:

- E-mail address
- Full postal address

All necessary files have been uploaded, and contain:

- Title
- Abstract
- Keywords
- 6 standard JEL codes
- All figure captions
- All tables (including title, description, footnotes) Further considerations
- Manuscript has been 'spell-checked' and 'grammar-checked'
- References are in the correct format for this journal
- All references mentioned in the Reference list are cited in the text, and vice versa

- Permission has been obtained for use of copyrighted material from other sources (including the Internet)

Printed version of figures (if applicable) in color or black-and-white

- Indicate clearly whether or not color or black-and-white in print is required.
- For reproduction in black-and-white, please supply black-and-white versions of the figures for printing purposes.

For any further information please visit our customer support site at <http://support.elsevier.com>.

## AFTER ACCEPTANCE

### *Use of the Digital Object Identifier*

The Digital Object Identifier (DOI) may be used to cite and link to electronic documents. The DOI consists of a unique alpha-numeric character string which is assigned to a document by the publisher upon the initial electronic publication. The assigned DOI never changes. Therefore, it is an ideal medium for citing a document, particularly 'Articles in press' because they have not yet received their full bibliographic information. Example of a correctly given DOI (in URL format; here an article in the journal *Physics Letters B*):

<http://dx.doi.org/10.1016/j.physletb.2010.09.059>

When you use a DOI to create links to documents on the web, the DOIs are guaranteed never to change.

### *Proofs*

One set of page proofs (as PDF files) will be sent by e-mail to the corresponding author (if we do not have an e-mail address then paper proofs will be sent by post) or, a link will be provided in the e-mail so that authors can download the files themselves. Elsevier now provides authors with PDF proofs which can be annotated; for this you will need to download Adobe Reader version 9 (or higher) available free from <http://get.adobe.com/reader>. Instructions on how to annotate PDF files will accompany the proofs (also given online). The exact system requirements are given at the Adobe site:

<http://www.adobe.com/products/reader/tech-specs.html>.

If you do not wish to use the PDF annotations function, you may list the corrections (including replies to the Query Form) and return them to Elsevier in an e-mail. Please list your corrections quoting line number. If, for any reason, this is not possible, then mark the corrections and any other comments (including replies to the Query Form) on a printout of your proof and return by fax, or scan the pages and e-mail, or by post. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. We will do everything possible to get your article published quickly and accurately. It is important to ensure that all corrections are sent back to us in one communication: please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility.

## AUTHOR INQUIRIES

You can track your submitted article at <http://www.elsevier.com/track-submission>. You can track your accepted article at <http://www.elsevier.com/trackarticle>. You are also welcome to contact Customer Support via <http://support.elsevier.com>.
